Figure 1. Schematic representation of the experimental design. The first part of the experiment consisted of a familiarization phase, followed by a training phase and a test phase. The training phase was divided into two parts: a pre-training phase and a training phase. The test phase was divided into two parts: a pre-test phase and a test phase. The pre-training phase and the pre-test phase were used to familiarize the subjects with the task and the equipment. The training phase and the test phase were used to measure the effect of the intervention on the subjects' performance.
